PROFESSIONAL PROFILE

Enthusiastic and goal-oriented Computer Science and Education graduate with a second-class upper degree. I'm looking for opportunities within a respected IT organization where I can both expand my expertise and make valuable contributions towards the achievement of the company's goals.

EDUCATION

Ekiti State University, Nigeria   **February 2022**

BSc. Computer Science and Education

Grade: Second-class upper Honour

WORK EXPERIENCE

Delta Broadcasting Service, Warri, Nigeria   **March 2022 – March 2023**

Position: System Administrator (NYSC)

- Performed troubleshooting and diagnostic assessments of hardware and software issues, ensuring minimal downtime for end-users.
- Executed timely and efficient repairs on computer systems, peripherals, and network equipment, enhancing overall operational efficiency.
- Collaborated with cross-functional teams to plan, execute, and oversee the installation of software applications, operating systems, and hardware components.
- Configured and maintained network infrastructure, including routers, switches, and firewalls, to ensure secure and reliable connectivity.
- Provided user training and technical support, addressing inquiries, resolving issues, and enhancing IT literacy among staff.
- Documented and maintained comprehensive records of all IT-related activities, including equipment inventory and service history.

Bincom ICT Solutions, Lagos, Nigeria   **May 2023 – present**

Position: DevOps Engineer (Intern)

- Designed, implemented, and maintained CI/CD pipelines to automate software build, testing, and deployment processes
- Collaborated with development and operations teams to streamline workflows, fostering a culture of collaboration and continuous improvement.
- Managed infrastructure as code (IaC) using tools such as Terraform and Ansible to provision and configure cloud resources.
- Ensuring the smooth operation of cloud infrastructures, such as servers, database, DNS, and networks.
- Establishing, maintaining, and monitoring systems, while also implementing logging mechanisms to track performance and identify issues.
- Taking charge of documenting infrastructure processes, configurations, and troubleshooting steps to ensure a comprehensive and accessible knowledge base.
- Providing technical support to team members offering assistance and resolving issues related to infrastructure and associated technologies.

PROJECTS

- I led a team of three persons in developing Virtual Top up (VTU) web application, using HTML, CSS, PHP, MYSQL, and JavaScript. It gives easy access to Mobile airtime, Electricity and Cable TV top up.
- Teamed up with three others to create a program that can index document from a file system, to make file maintenance, and retrieval easy.
- I independently deployed diverse web stack infrastructures, such as LAMP, LEMP, MERN, and MEAN, on AWS EC2 instances
- I independently designed and implemented a 3-tier architecture, including web, database, and Network File Sharing servers. Additionally, I configured an Apache load balancer for equitable traffic distribution and established continuous integration and deployment using Jenkins and GitHub
- As a freelancer, I have developed a variety of E-commerce websites, including a hair salon website with an appointment booking system and a real estate website.

SKILLS & ATTRIBUTES

Languages: JavaScript, HTML, CSS, PHP, Scripting
